5.6: Styles of Management

Learning Objectives

1. Understand and discuss how various styles of management, including Theory X, Y, and Z, influence workplace culture

People and their relationships to dominant and subordinate roles are a reflection of culture and cultural viewpoint. They are communicated through experience and create expectations for how and when managers interact with employees. The three most commonly discussed management theories are often called X, Y, and Z. In this section, we'll briefly discuss them and their relationship to intercultural communication.

Theory X

McGregor’s Theory X asserts that workers are motivated by their basic (low-level) needs and have a general disposition against labor. In this viewpoint, workers are considered lazy and predicted to avoid work if they can, giving rise to the perceived need for constant, direct supervision. A Theory X manager may be described as authoritarian or autocratic, and does not seek input or feedback from employees. The view further holds that workers are motivated by personal
interest, avoid discomfort, and seek pleasure. The Theory X manager uses control and incentive programs to provide punishment and rewards. Responsibility is the domain of the manager, and the view is that employees will avoid it if at all possible, to the extent that blame is always deflected or attributed to something other than personal responsibility. Lack of training, inferior machines, or failure to provide the necessary tools are all reasons to stop working, and it is up to the manager to fix these issues.

Theory Y

In contrast to Theory X, Theory Y views employees as ambitious, self-directed, and capable of self-motivation. Employees have a choice, and they prefer to do a good job as a representation of self-actualization. The pursuit of pleasure and avoidance of pain are part of being human, but work is also a reward in itself, and employees take pride in their efforts. Employees want to reach their fullest potential and define themselves by their profession. A job well done is a reward in and of itself, and the employee may be a valuable source of feedback. Collaboration is viewed as normal, and the worker may need little supervision.

Theory Z

Each of these theories of management features a viewpoint with assumptions about people and why they do what they do. While each has been the subject of debate, and variations on each have been introduced across organizational communication and business, they serve as a foundation for understanding management in an intercultural context.

Key Takeaway

- Management Theories X, Y, and Z are examples of distinct and divergent views on worker motivation, need for supervision, and the possibility of collaboration.

Exercise \(\PageIndex{1}\)

1. Imagine that you are a manager in charge of approximately a dozen workers. Would you prefer to rely primarily on Theory X, Y, or Z as your management style? Why? Write a short essay defending your preference, giving some concrete examples of management decisions you would make. Discuss your essay with your classmates.
2. Describe your best boss and write a short analysis of what type of management style you perceive they used. Share and compare with classmates.
3. Describe your worst boss and write a short analysis of what type of management style you perceive they used. Share and compare with classmates.
